- 4" - B680 Butterfly Valves.

GRINNELL SOLUTIONS:

This project was one of the most high profile projects in the city of Atlanta. Due to a strict schedule to have this facility online for the 2007 school year there had to be a high level of communication and scheduling between the contractor, distribution, and Grinnell to make this a successful endeavor. This building is actually three buildings joined by a recreation area, and has a state-of-the-art computer facility. It is one of the most sought after residences in the city. The facility is within walking distance of Centennial Park which was the location for the 1996 Olympics, and the new Georgia Aquarium.
