GRINNELL Figure BV435 Grooved End Stainless Steel Ball Valve and GRINNELL Figure B480 Grooved End Stainless Steel Butterfly Valve

Lansdale, PA (February 2016) – Tyco Mechanical Products is excited to announce the release of the GRINNELL Figure BV435 Grooved End Stainless Steel Ball Valve and the GRINNELL Figure B480 Grooved End Stainless Steel Butterfly Valve. The addition of these two new valves enhances the GRINNELL Stainless Steel grooved portfolio and expands the value Tyco Mechanical Products brings to the HVAC, Plumbing and Industrial verticals.

The GRINNELL Figure BV435 Grooved End Stainless Steel Ball Valve (available in sizes 1-1/2" - 4") provides efficient control of fluid in piping systems, servicing up to 600 psi. The user-friendly design allows the valve to be positioned in any orientation, while enabling flow from either direction. The valves are furnished with a CF8M (316) body and tamper-resistant lever handle with holes for locking in either the open or closed position.

The GRINNELL Figure B480 Grooved End Stainless Steel Butterfly Valve (available in sizes 2" - 6") provides variable flow control with a 10-position locking lever handle, servicing up to 300 psi. The body is CF8M (316) with a dual-seal disc, encapsulated either with Grade "EN" EPDM for cold water services or with Grade "T" Nitrile for oil services. The GRINNELL Figure B480 is also certified to all requirements of NSF/ANSI 61, Annex G and NSF/ANSI 372.

The GRINNELL Mechanical Products portfolio provides a complete offering of couplings, fittings, valves and accessories, making these new products part of a comprehensive solution for HVAC, plumbing and industrial process piping. To learn more about the GRINNELL Figure BV435 and GRINNELL Figure B480, contact your local GRINNELL Mechanical Products Territory Manager or visit www.grinnell.com.

About GRINNELL Products

GRINNELL, a premium brand of Tyco Mechanical Products, delivers quality piping solutions for a full range of mechanical, HVAC, mining, commercial, industrial and institutional applications. Available GRINNELL products offer contractors, engineers, and distributors safe, fast, and more cost-effective methods for joining pipe over traditional welding. Innovative GRINNELL products

include couplings, fittings, mechanical tees, valves, and accessories as well as complete systems for joining copper, stainless steel, plain end, G-PRESS press-fit and HDPE components. Comprehensive, competitively priced engineering and planning support services provide labor and cost savings. All GRINNELL Mechanical Products are backed by an industry-leading, 10 year limited warranty. For more information, visit www.grinnell.com.
